1 . Outline Of DFTS Project

This project is based on the recent cryptocurrency market situation and is a cryptocurrency project with the purpose of protecting investors.

The tasks of each company issuing encrypted currency involve financing, business construction, Whitepaper production, Token generation and security construction, market participation, Wallet development and management, IR transmission and so on. To accomplish all these tasks, you need to build the essential business, as well as the evolving knowledge and technical experience of the cryptocurrency industry.

This project is about financing, project construction and Whitepaper production other than the task, issuing cryptocurrency enterprises as a community (DFTS Global Club), jointly create the market, co-sponsor the value of the Token, while achieving the cause while protecting investors.

In addition, for enterprises that want to carry out new undertakings, they will provide free support for the financing of undertakings using cryptocurrencies and tasks related to cryptocurrencies, and fully support the start of new undertakings.

The organization "DFTS Global Club] issued token (DFTS) is the base currency of this project is" unprecedented new concept cipher currency ".

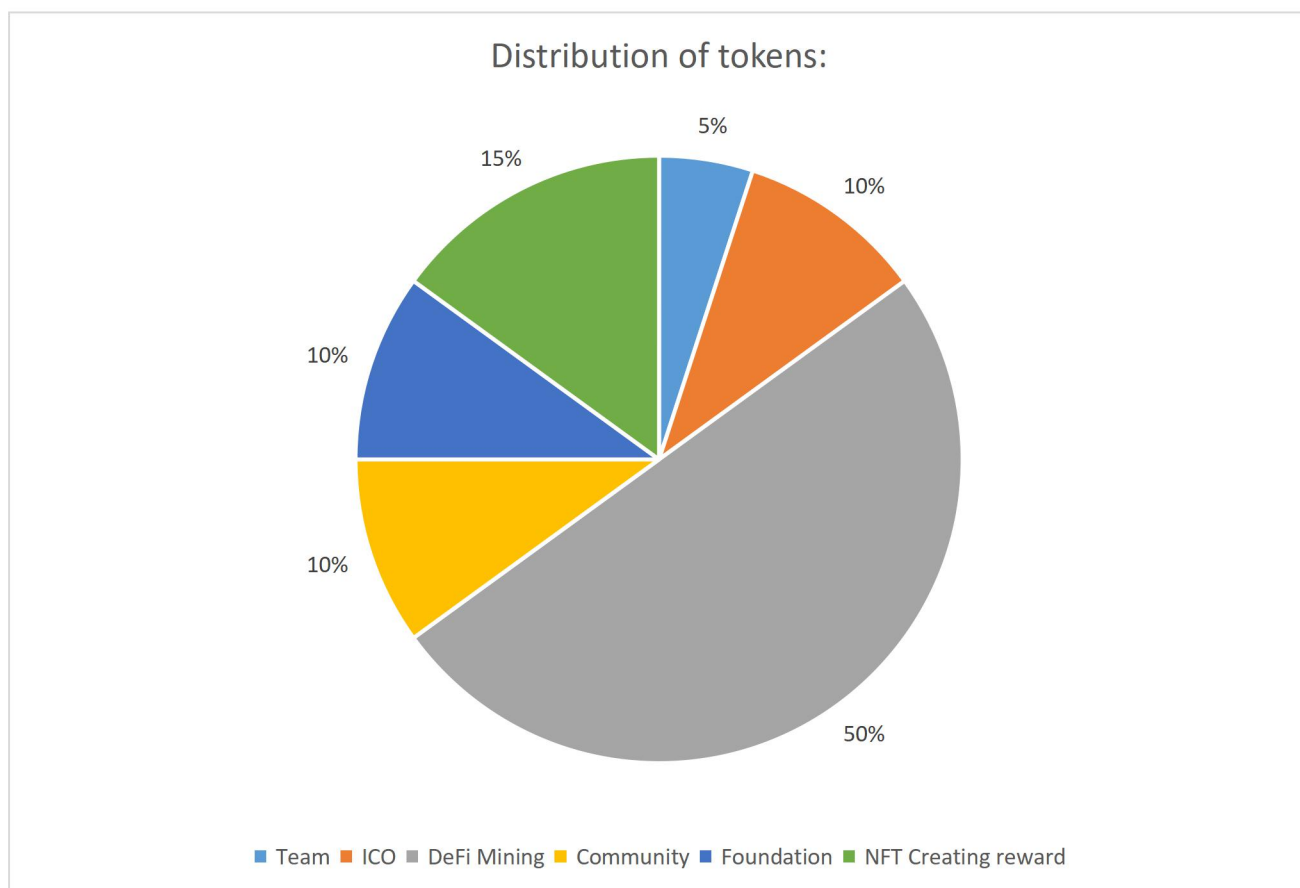

2. [DFTS Token]

[DFTS Token] means the cryptocurrency issued by the Community (DFTS Global Club), which is the base currency used by the Community (DFTS Global Club),” he said.

On the alliance trading platform, NFT transactions can be made with DFTS tokens, and DFTS can be used for pledge and AMM mining.

The encrypted currency added (matching bonus) is added to the DFTS Global Club] governance token DFTS Token and other digital currencies through the trading market "JUST SWAP、CAKE SWAP] transaction ", and the token added to the pool of funds can receive the reward token every week. This will greatly increase the holder of the token.

Distribution of tokens:
